

CELEBRATING
50
YEARS
1972-2022

Bringing you
the goodness of nature

Tradition of Trust

Food designed to meet health needs of all generations

Certificate of Excellence

Jeevans house proudly received Honorary certificates for the outstanding industry usage of the Ragi decortication and Ragi flaking technology developed by CFTRI on the National Technology Day – 2010

Award

Years of research at Jeevans house has resulted in the discovery of an innovative processing method that gives these millet based products. And for the contribution made by us to the diet food industry helped us to proudly receive "Gem of India Award" in the year of 2011.

Chairman's Desk

Ragitone was inceptioned in the year 1972 and the support we received from our customers encouraged us to continue our journey and produce value-added yet healthy millet-based foods for everyone. Millet or Eleusine Coracana is the best healthy choice among grains which is used to make Ragitone and proved to be a good food supplement for children of all ages.

Over the years of research and development we have learned that daily use of millet sustained with its bran proved to have long-lasting health benefits. This gave us the confidence

to move further and advance by introducing more products to the market.

Initially, people were skeptical about millets but as they started using our products they later welcomed it considering its health benefits. Gradually, we acquainted with more grains such as Barnyard Millet, Sorghum Millet, Pearl Millet, Foxtail Millet, Proso Millet, Kodo Millet and Little Millet. And today we are proud to announce Jeevans House as one of the most promising Millets based food manufacturer in India.

Jeevans house's next goal is to inception many innovative products free from chemicals and pesticides so that we can build 'Good Food Culture' among our consumers which is our Motto.

K.P. Gopinath
Chairman
